CHEVROLET	6.2-J (376)	2019-20	Suburban	GMC	6.2-L (376)	2021	Yukon XL

• Includes parts needed to disable the Active Fuel management (AFM) on GM 6.2 Engines L86, L87 & LT1

Important AFM delete Kit Notes:

- When installing a delete cam, the active fuel management lifters must be replaced using Non-Active Fuel Management Lifters.
- The valve lifter guides used in Non-Active Fuel Management engines are different from those used in Active Fuel Management engines and must be replaced when installing Non-Active Fuel Management Lifters.
- The VLOM must be replaced with a Non-Active Fuel Management Valley Cover.
- Pushrod length must be checked during installation to verify that the correct length pushrods are being used.
- The vehicle engine control module/power train control module must be reprogrammed to turn off the Active Fuel Management system in the operating software.
- **NOTE: Vehicle Will Not Be CARB Compliant After The Vehicles Engine Control Module/Power Train Control Module Is Reprogrammed.**

Components must be used together

Component#	Description	Qty
