CHEVROLET 5.3-C (325) 2015-20 Tahoe	GMC 5.3-C (325) 2015-20 Yukon XL

• Includes hard parts needed to disable the Active Fuel management (AFM) on GM LS Engines as well as the programming interface

Important AFM delete Kit Notes:

- When installing a delete cam, the Active Fuel Management lifters must be replaced using Non-Active Fuel Management lifters.
- The valve lifter guides used in Non-Active Fuel Management engines are different from those used in Active Fuel Management engines and must be replaced when installing Non-Active Fuel Management lifters.
- The VLOM must be replaced with a Non-Active Fuel Management valley cover
- The vehicle engine control module/power train control module must be reprogrammed to turn off the Active Fuel Management system in the operating software.

• **SEMA Emission Certified 49 State Compliant** •

**Part number
MDK400-HPT
UPC: 729295152972**

Components must be used together
