GMC	6.2-J	(376)	2017-20	Yukon
GMC	6.2-J	(376)	2017-20	Yukon XL

- **Includes parts needed to disable the Active Fuel management (AFM) on GM 6.2 Engines**

Important AFM delete Kit Notes:

- When installing a delete cam, the active fuel management lifters must be replaced using Non-Active Fuel Management Lifters.
- The valve lifter guides used in Non-Active Fuel Management engines are different from those used in Active Fuel Management engines and must be replaced when installing Non-Active Fuel Management Lifters.
- The VLOM must be replaced with a Non-Active Fuel Management Valley Cover.
- Pushrod length must be checked during installation to verify that the correct length pushrods are being used.
- The vehicle engine control module/power train control module must be reprogrammed to turn off the Active Fuel Management system in the operating softwear.
- **NOTE: Vehicle Will Not Be CARB Compliant After The Vehicles Engine Control Module/Power Train Control Module Is Reprogramed.**

Part number MDK700-HPT1

UPC: 729295153078

Components must be used together
